

# Sol Robots Releases *Crossword Forge 4.7*

October 16, 2006 - Sol Robots announced today the release of *Crossword Forge 4.7*, a major upgrade to the popular classroom crossword and word search puzzle generator. *Crossword Forge* is now a Universal Binary and so runs natively on both Intel and PowerPC Macs. Version 4.7 also has an improved web export panel that allows customization of colors including setting the page color and control accent color. A new web preview command allows you to make and view changes to the web puzzles. Many additional improvements were added to *Crossword Forge 4.7* allowing *Crossword Forge* to continue to give the best experience to anyone who wants to make a crossword puzzle.

“Whether you are making puzzles for print or the web, *Crossword Forge* always provides great functionality, usability and value.” said Cortis Clark, President of Sol Robots.

## **Pricing and Availability**
